TELEGRAMS
TO
STANDARD.
By direct cables via Lisbon.
Buenos Aires, 7th.—The epidemic sprang
upwards yesterday, 40 fresh cases and
17 deaths.
St. Petersburg, 7th.—The latest bul-
letin reports 23 cases and 8 deaths.
Hamburg, 7th.—Yesterday there were
23 fresh cases and 4 deaths.
Paris, 7th.—In the past two days, no
change in the public health.
A telegram from Kolono reports a
fresh history of Cholera, who has
again reached the Bahama Islands, carrying
arms and prisoners, and causing them
severe loss in killed and wounded.
The French loss is trifling. The rifles
captured were made in Germany.
Colonel Doudle is now near Albany,
the capital of Dahomey, and the cam-
paign may be considered as ended in
favor of France.
Paris, 7th.—Rena's funeral to-day was
an imposing ceremony, and an immense
audience witnessed the funeral.
The members of the French Academy,
the College of France, the Institute and
almost all the scientific and literary
corporations of Paris attended.
Switzerland, Belgium, Spain and Italy
were represented. The Minister of
Education delivered an eloquent fune-
ral oration.
Genoa, 7th.—Twenty towns have been
freed from the outbreak of cholera.
The verdicts of the Exhibition Jurors
show the good results of the Show. Se-
veral Argentine products have been
awarded prizes.
The death of Valentini has much re-
gretted here.
Paris, 7th.—The decree dissolving
Parliament and ordering a general elec-
tion on 6th November is expected on
Monday.
Premier Grollier will shortly publish a
manifesto declaring his political and
financial programme, which has yet,
however, to be submitted to a Cabinet
Council.
Excluding Austria and Germany, all
nations have agreed with the Vatican as
the new Cardinals to be created at the
next Consistory.
Negotiations are still going on with
Venezuela relative to the loan, at least
with Germany, is looked for.
It is feared that the Consistory will
be held at Rome, owing to the evident
purpose to favour France in every way.
The Argentine Consulate at Buenos
Ayres has received the Argentine dele-
gates and expressed her satisfaction at the efforts of
all Argentine nations to honour the
memory of Columbus.
Castelar's book on Columbus has been
published, and it is looked for as the
best work. The edition is already ex-
hausted.

The above 12 articles show an average
of official valuation to real value as 220
to 100, but other articles are much less
lyrically assessed and in some cases
the official value is lower than the
reality. We are prepared for the ob-
jection that a reduction of the official
valuation will cause a loss to the re-
venue, at least in some articles. But,
nothing can justify what is manifestly a
fraud to the consumer. If the Customs
Law fixed a duty of 30 per cent "ad
valorem," and that the Valuation Tariff
put down the value at twice the reality
it is clear that the consumer comes to
pay 60 per cent or double the value
ordered by Congress. Such is precisely
the case as regards printing paper, and
we could cite many others. It is diffi-
cult to imagine anything more frau-
dulent or disgraceful.

Another evil resulting from these
fictitious valuations is the confusion
which they introduce into the annual
trade returns.
Take for example the official returns
for the last five years, as follows:—
Imports. Exports.
Year. \$ gold. \$ gold.
1887.... 417,400,000 84,400,000
1888.... 428,400,000 100,100,000
1889.... 404,000,000 125,800,000
1890.... 442,200,000 100,000,000
1891.... 67,200,000 96,700,000
5 years. 619,800,000 506,800,000

The Protectionists in Buenos Aires
and Tucuman point to the above figures
as a proof that there has been a large
increase in the value of imports and ex-
ports in five years, amounting to
\$15,000,000 gold, or \$23,000,000 in ex-
ports against the country. But, when we
take the real figures (discrepancy at
\$38 per ton and at \$18) we find the
facts very different, viz:—
Imports. Exports.
Year. \$ gold. \$ gold.
1887.... 78,200,000 70,300,000
1888.... 85,000,000 83,400,000
1889.... 109,700,000 75,100,000
1890.... 84,900,000 84,900,000
1891.... 44,800,000 80,600,000
5 years. 413,200,000 334,300,000

The unbridled extravagance of the
year 1889 caused an excessive amount of
imports, and the crisis of 1891 led to
a corresponding fall. In normal years
it will be found that imports and exports
are nearly equal.

By putting the Valuation Tariff on a
proper footing we shall be in a position
to ascertain the true value of imports
and exports, and if the present system be
continued it will only serve the purpose of
concealing the truth from the public eye.
The death of Valentini has much re-
gretted here.

THREE MORE VICTIMS.
Yesterday's telegram from Rosario
announces the assassination of three more
sailors in one of the Santa Fe colonies,
in broad daylight. Coming so quick up
on the murderous outrages at Bolivar
and La Boca, this is a most shocking
and unaccountable crime. The assassins
are still going on with their work, at
least with Germany, is looked for.
It is feared that the Consistory will
be held at Rome, owing to the evident
purpose to favour France in every way.
The Argentine Consulate at Buenos
Ayres has received the Argentine dele-
gates and expressed her satisfaction at the efforts of
all Argentine nations to honour the
memory of Columbus.

MARRIAGE OF MISS POLLARD.
On Wednesday evening took place
the marriage of Miss Minnie Pollard of
Buenos Aires to Mr. Luis Phillips, agent of
the Caracra Creamery in this city.
At the church of Lomas the bride was
attended by her sister, Miss Pollard, and
some 50 friends who soon thronged
the pretty little church.
The bride wore a cream-colored sat-
in dress, with a long lace veil, and was
given away by her father, and at-
tended by her sister, Miss Pollard, and
the two Miss Goodes as bridesmaids.
Mr. Holman was "best man."
There was a great display of beauty
among the fairer portion of the wedding
guests, and after the ceremony the party
drove back to Mr. Pollard's house and
were entertained in royal fashion till
early morning. Many useful and
costly presents, were presented to the
bride.—Herald.

ON OBSERVATORIES.
Mr. Editor—
In a recent number of your paper I
saw a reply called forth by my obser-
vations to the effect that the employees at
the Observatorio were not allowed to be
admitted to the observatory in the eve-
ning, as they are only for "studying the
stars and their movements." Precisely
this occupation is what enabled the per-
son mentioned in the Argentine Corre-
spondent to be admitted to the observatory
in the States by Professor Tolson: "Se-
vere demonstrations of solar power,"
which was verified exactly, for a heat
wave set in which crossed from the
United States to Europe and was felt in
France, Germany and Austria, where
several deaths from sunstroke occurred.
The heat registered above 100° Fahr.
in the shade. Now it struck me on read-
ing these occurrences that what was
done by one man may be done by others.
"pro bono publico" even if it was not
intended in the bond.

Then we have the one other office or
bureau whose more immediate duty is
to give to the public information con-
cerning a probability of a coming
storm or rain, if it would be equal to
"Old Betty's joints" or Sir Isaac
Newton's rain, or the local saying of
"the North wind brings cattle from the
South."
But there is better hope for us. When
the reports of years are collated from
observers in distant places and away
into the next century—not sooner—then
there is a probability of something being
done for us, and then the "magnificent
distances" we have to contend with.
This reminds me that we read daily in
the STANDARD how the weather was
in London, day before yesterday, and
in the States. Also that "Mars has a
radius of 3,700,000 miles."
These, if you like, are magnificent dis-
tances to which our "pompas" are of no
comparison.

The fact that the said Mars is
found to be inhabited, and canals, paral-
lel to and at right angles cross one an-
other, and other signs of a high state
of culture, showing evidently the same
case as our own, and that "Mars has a
radius of 3,700,000 miles."
These, if you like, are magnificent dis-
tances to which our "pompas" are of no
comparison.

BUENOS AYRES SAILORS' HOME.
Dear Sir,
Noticing in your edition of to-day a
notice from the Buenos Ayres Sailors'
Home, I think I may safely say the society has
no such place here. Its equivalent, the
Good Templar order, meets every Thurs-
day night in the Saladero Home, at 7.45.
Should your correspondent desire any
further information regarding the order,
or wish to join, I shall be glad to give
him information, either by writing or
by your personal interview.
Yours truly,
Non-Exaggeration.
Ed. Note. It is surprising that the
Lomas people were undisturbed by the
marital movement on Wednesday night,
when the 11th Cavalry came into town.
Probably some of our Lomas readers
did hear the clatter.

CENTRAL PRODUCE MARKET.
Oct. 6th 1892.
Mr. Editor,
Since I last addressed you on this
subject I read that the supporters of the
proposal to make this the sole produce
market held a meeting in the Bolso.
Without wishing to modify the views
reported that the manager of the Southern
Railway assured them that he had
no authority to invest money in the con-
struction of new sheds, and that he would
be filled. This is something in fact
that I suggested in my first letter, to
have an undertaking among all parties
interested, and do by mutual agreement
what would be for the benefit of the
market. And now that the season is
approaching, it seems the propitious
time for further action.

HARVEST IN THE UNITED KINGDOM.
Writing to us on the 7th of Sept., an
English agricultural correspondent says:
A tardy harvest still drags its slow
length along; the weather having been
unfavourable since it began, and very
wet at times. The only crops above
average are barley and potatoes, and the
1st bar has been damaged by disease.
The wheat crop is never promised
well, but since the end of July it has
been going from bad to worse,
owing to light, mildew and sprouting
caused by wet weather where

the crop was cut and not carried. In ad-
dition there has been a good deal of
shedding of grain among the uncut
wheat and barley crops. The yield of
wheat will be about the most deficient
on record; for, although the yield per
acre may be less deficient than it was in
the "black year," 1879, the acreage is
much smaller. The preliminary agri-
cultural returns put the area of the
wheat crop in Great Britain at 2,219,833
acres. Adding for Ireland and the Channel
Islands, we have about 2,512,000 acres.
The yield of marketable grain is not
likely to exceed 20 bushels an acre,
including straw, and may be put at 25
bushels. This is the estimated yield
will give us about 62,150,000 bushels
and, allowing for seed and food for
live stock, we cannot reckon on more
than 50,000,000 bushels for bread.
The consumption in recent years has been
of D.C.L., and the Fellows of his own
college, Trinity, Cambridge, endorsing
